

Garden Summary

Nate Shulman

Pd-2

3-27-14

I had to find information about whom we could contact to help us get started on a garden and we decided to contact a company called master gardeners, they work in Maryland and help people get started on making gardens. We had Mrs. Sweeney a manager of electrical use of schools in Howard County. She talked to us about ways to save energy in our school and how much the bill for our school is and how much each light costs. We asked her many questions like what's the bill compared to other schools in the county and what is the bill compared to other years we have been here. So I took information from my classmates of how many lights we had in the school when all added up we had couple hundred lights throughout the whole school.
