Nahom Zeleke

Yoseph Guta

For the past 3 weeks Nahom and I were researching a type of fence that is strong and cheap. After a long period of research, we found a fence that costs \$20.70. For the garden door , the fence post costs \$8.17 and it's 8 ft tall. The hinges costs \$9.18. We have been doing sketches of drawing of the garden. The garden will be 10 by 14 feet. It will be outside of the eighth grade hallway.

supply's for compost bin

- home depot southern patio 2 water can \$4.88
- home depot rubbermaid Roughneck 32 gallon black wheeled trash can \$14.97
- 2 home depot bricks **Oldcastle 16 in. x 8 in. x 8 in. Concrete Block** **\$1.47 each**
- drill
- home depot **Grip-Rite #13 x 2 in. 6D Bright Steel Finish Nails (1 lb. Pack)** **\$2.68**

First we need to put brown materials in first such as hay, straw, old leaves, and sawdust at the bottom. Then you add green materials like organic matter, such as green grass clippings, manure, table scraps, or even high-nitrogen fertilizer, such as cottonseed meal, on top of the brown materials. Then you add 2 cups of water to the compost bin and put the lid on the compost and mix them. Keep doing it over and over for a long time. Then when its compost use it.

bulk Soil

3/31/14

Jordan Asafo-Adjei

Javier Aguin

Garden size in cubic feet: 140cu ft.

Garden size in cubic yard: 15.6 cu yd.

$$\begin{array}{r} 15 \text{ cu yd.} = 449.85 \\ + \quad \underline{29.99} \\ 16 \text{ cu yd} = \underline{\$479.84} \end{array}$$

$$1 \text{ cu yd} = 29.99$$

we were finding how much bulk soil we need. we figure out how much we needed in cubic feet. then we transfer it to cubic yards. we need 15.6 cubic yards but we round it to 16. the garden is 10 feet by 14 feet and 1 feet high. to get all the soil we need for the garden we need to spend \$479.84.
